1.D. How do I see how this program works?

1.D.1. I made two youtube videos to help you out.

1.D.1.1: An intro of the entire program and how to navigate discord: see step 2 of #start-here
<https://youtu.be/BgDIRiO4u0E>

1.D.1.2. An intro on how I give out the watchlist and an idea of how the live room works:
<https://www.youtube.com/watch?v=DSJ6YVXUgqA&t=111s> or you can view
<https://youtu.be/ZgMZAXxLdfk>

1.E. Are all the premium packages recurring and will they automatically renew?

1.E.1. Subscription packages:

1.E.1.1 (monthly, quarterly, yearly) will renew automatically on their own, unless you cancel prior to next renewal date.

1.E.1.2 Example: If you purchased a "monthly" package from either discord or from the website on April 1st, your monthly package will auto-renew on May 1st.

1.E.1.2.1 To prevent this from happening you must cancel anytime before your renewal and at the latest within 48 hours of the renewal date, anything after that will go through and renew again. Using the example above if you purchased on April 1st you must cancel by April 28th at the latest or you will get charged for the next month. Also if you purchased on the monthly subscription on April 1st and cancel on April 2nd...your membership will last the monthly subscription you paid for April and you will lose access on May 1st. **WE DO NOT REFUND. YOU MUST CANCEL WITHIN THE GIVEN TIME. NO EXCUSES!!**

1.E.2. Lifetime and Course Packages:

1.E.2.1 DO NOT auto-renew they are **ONE TIME PAYMENTS.**

1.F. HOW DO I CANCEL MY MEMBERSHIP.

1.F.1 IF YOU PURCHASED FROM DISCORD STEP PER SECTION 1 STEP 1.

1.F.1.1 ENTER "downgrade and role-name" in the example below user "roughandrowdy" purchased the role "monthly access" the bot sent them a message to grant their role. "roughandrowdy" then cancelled their membership by typing "downgrade monthly access", which the bot after sent them a message saying their role will be removed after their subscription ends. So in this case they purchased on April 5th, On June 5th their role of "monthly access" will be removed and they will return to the role of "free member" and lose access to the premium channels. SEE Image below.

1.F.2 If you purchased from the website www.stockmarketwolf.com per section 1 step 2.

1.F.2.1 log into your paypal

1.F.2.2 click the charge under "recent activity"

1.F.2.3 Click "manage modern millionaire society payments"

1.F.2.4 Click on "cancel" and then hit "confirm I wanted to cancel"

1.G WHEN SHOULD I CONTACT THE WOLF?

1.G.1 I WILL NOT ANSWER ANY QUESTIONS that I have already covered through the start-here video , how the live trading room works video, something covered in this document that is super clear, rather I would just point you in the direction. I will not help you if you do not help yourself. We are all adults, so I expect a level of accountability and professionalism.

1.G.2 ONBOARDING: IF you followed the onboarding steps described in section 1 **AFTER** 24 hours, you have not been granted access THEN you can email me at stockmarketwolftrading@gmail.com with the title "onboarding help" and include your username, discord ID, email on file, and proof of receipt. IF I see you didn't follow the proper steps I will give you one warning to go back to this document and follow the steps to upgrade, I notice a lot that people do not verify their discord, which is a step that must be followed....if this continues....i will just refund your money and remove you from the group I have a zero tolerance for people who cant follow simple instructions. If you cant follow these simple instructions you can't follow instructions when it comes to trading and I wont have that in my group PERIOD. Email stockmarketwolftrading@gmail.com with the title "cancellation followed by your username and role" example "Johndoe Monthly Access". Also provide proof that you tried to cancel prior to 48 hours of your renewal date. I will also need to know if your subscription came per section 1 step 1 Discord Server or per section 1 step 2 our website. I will need all your discord information, discord name, email, identification number and membership you have.

If there are issues with the website, if there are issues with the live (first try upgrading your zoom)...if persist then we can try and work together. If there are issues with the course website we can try and help resolve together, if these issues fall within you technical issues email me at stockmarketwolftrading@gmail.com with the title "technical issue and type". Example for an issue with discord "technical issue discord" in the body of the email ensure to identify your discord information.

I.G.7 DISCORD: I WILL NOT RESPOND TO ANY MESSAGES THAT "@stockmarketwolf" in discord channels. If you have a question for me you can email per the steps above, if the question doesn't fit within those categories you can DM me in IG or Discord.

1.G.8: Trade Related Questions: If you have questions you want to ask me directly you must follow the same rules as the 1:1; you must have watched the free course, premium course (if applicable), practiced in the simulator for a least a month, have your metrics tracked in excel or www.tradervue.com. When messaging me on email include the title "trading help and your membership" i.e trading help monthly access, trading help lifetime member. In the body of the email include your discord information. And then provide the following, an attachment of your track record,

1.B Important Times

1.B.1 Watchlist: 0600-0622 AM PST I will post a premarket watchlist

1.A.1.1 Watchlist is ONLY for premium members. If you need to upgrade to [Section 1.](#)

1.B.2 Livestream: 0615AM-0630 AM PST I will post the link to the live trading room

1.B.3 Livestream Communication: 0600/0615 to 0700/0730 I will give my input via voice communication within the zoom trading room M-F (I don't talk every day, some days nothing to say)

1.B.4 Livestream After the Wolf: 0730-1000 AM PST I will leave the livestream up so you have access to all the scanners that I provide, even without me in the room, you get a lot of value from the scanners. YOU will be required to put the tickers into your chart, EVEN when I am in the room. There are times I could be looking at one stock...while another is making a move....so it is YOUR responsibility to put the tickers into your chart and Analyze them if they are worth a trade.

1.C Watchlist:

1.C.1 When I provide the watchlist there are three key components to using it properly; Filter the stocks, analyze the stocks and trade the stocks.

1.C.1.1 Primary: Filter from the stocks from the list that follow the criteria:

1.C.1.1.1 Less than 50M float (means low supply)

1.C.1.1.2 Gapped up a minimum of 4% from previous trading days close

1.C.1.1.3 Between \$1-\$50

1.C.1.1.4 Volume of 50K+

1.C.1.2 Secondary: Analyze based on the following steps:

1.C.1.2.1 News: is there good news supporting the stock moving up currently

1.C.1.2.2. Year trend: what does the overall trend look like, where are support and resistances, where are we in relation to Emas

1.C.1.2.3. 5d5m chart: What's the trend, support and resistance, are we above emas, are we displaying bull signals currently or bear signals, map out entry points, determine math for position size based on the excel file I provided

1.C.1.3 Tertiary: Take the Trade: Once you have done the primary and secondary steps next is to take the trade. Ensure you have the proper position size and your stop and profit target determined PRIOR to taking ANY AND ALL TRADES. If you are new you should practice in a simulator before going live.

1.C.1.3.1 Before entering a trade READ THE Level 2 and time and sales as well as setting proper stop loss and position size. The level 2 and time and sales is the real-time sentiment on a stock and thus must be highly respected. All other things could be in line, but if the current real-time sentiment says otherwise...then we don't take the trade.

1.C.2 The premarket list alone does NOT mean you should trade what is on this list. you must do your research prior to taking a trade, there are times when nothing hits our target from the premarket list and we find a stock intraday, the stock we find intraday we analyze the SAME WAY as listed above.

1.D Live Trading Stream:

1.D.1 Pre-reqs: you must follow before joining a livestream session

1.D.1.1. Make sure to complete the start-here channel steps

1.D.1.2 you have a good understanding of the basics, whether from the free course, books or other online training

1.D.1.3 you understand i am not responsible for ANY of your losses, you are accountable for your own trades.

1.D.1.4 you understand how the stream works by visiting the videos listed

<https://youtu.be/ZgMZAxxLdfk>

<https://www.youtube.com/watch?v=DSJ6YVXUgqA&t=111s>

1.D.1.5 you agree to our privacy policy and terms/conditions listed on our website.

1.D.2 During the livestream: our scanners will help us find stocks, we will look at stocks from the watchlist and we have one chart to move from stock to stock to show you. What shows on the stock chart, the stock I may be talking about, or stock on the scanner does not mean for you to trade it. You must determine for yourself which stocks you should trade. In addition to that, I can be focusing on one stock and there could be another that moves on the scanner or hitting target from watchlist that I may not be viewing at the time...which is why it is YOUR responsibility to have a charting platform to chart the stocks and you filter through the stocks that fit your trading strategy. I will do my best to help find stocks, but it is not my sole responsibility. I give you the tools to be successful....it is up to you to utilize the tools.

1.D.3 Communication During Stream: Not everyday will I talk in the livestream. There will be some days I am quiet due to multiple reasons, however you should have an understanding already from the free course, the tools on how to filter through the watchlist, have an understanding how the scanners work...which still should enable you to be successful. We also have people in the premium trading room typing messages to bring awareness to stocks. So me talking or not in the live room should NOT prevent you from trading. I am teaching self sufficiency not dependency. When I do talk during the stream and mention a stock it is just an opinion, it is important you use the tools from the course to determine entry, don't rely on me to say an entry or exit.
